

Tyco Retail Solutions RFID Performance Test Center

TEST CENTER DESCRIPTION:

The Test Center is located in a fully operational warehouse to best simulate real-world conditions. We offer multiple levels of testing in order to best fit our client's time and budget.

SERVICES/SOLUTIONS:

Standard Evaluation Procedures:

- Label Placement Processes:
 - **Label Placement Range Test.** Open air range test used to determine optimal label placement
- Dock Door Portal Test:
 - Records how many case and pallet tags are read when fully loaded pallets pass through a portal or dock door at speeds of up to 8 mph.
- Conveyor Portal Test:
 - Determines the capability of a product to be read in various orientations.
- Stretch Wrap Test:
 - Determines the total number of cases detected while pallets are wrapped in plastic.
- Consulting and Site Surveys:
 - Analysing customer processes and integrating off RFID Processes
