

RFID Solutions Center

TEST CENTER DESCRIPTION:

The RFID Solutions Center is an industry-recognized educational, testing, services, and real-world implementation resources facility dedicated to helping the global RFID community reap the rewards of RFID. Become a part of the RFID Solutions Center community today.

The RFID Solution Center offers to end-user organizations, educational institutions, and solution providers a range of training, testing, and consulting services:

- **Training:** Programs to help you with designing, implementing, optimizing, and managing an RFID ecosystem.
- **Testing:** An EPC Accredited Performance Test Center aimed to focus investments in value-driven directions and to increase confidence in success.
- **Professional Services:** Subject-matter expertise available to speed implementation, reduce trial and error, and minimize total cost of ownership.
- **Partner Ecosystem:** An array of technology providers, solution designers, system integrators, research organizations, and universities assembled to showcase solutions for increasing ROI.

SERVICES/SOLUTIONS:

Training - The RFID Solutions Center offers training programs to help you with designing, implementing, optimizing, and managing an RFID ecosystem.

- RFID Academy – RFID Academy offers courses ranging from an introduction to RFID to the complete standing-up of a complex RFID ecosystem. Taught by teams of experienced RFID Application Engineers, RFID Academy focuses on delivering an intensive, hands-on educational experience addressing the real-life issues and challenges of implementing RFID.
- Custom Training : The RFID Solutions Center offers the RFID Academy for on-the-road learning. This training program is designed to offer the comprehensive training found in the RFID Academy to large groups at their own facility. These classes can be customized to fit the needs of the group.
- CompTIA RFID+ Certification: The RFID Solutions Center is a certified CompTIA RFID+ Certified training and testing center. CompTIA test preparation courses provide a quick review of RFID

and ready the student for the CompTIA RFID+ exam. The exam can be taken at the RFID Solutions Center as well.

Tag Placement & Testing – The RFID Solutions Center offers comprehensive Tag Selection and Placement services. RFID Tag Selection & Placement combines practical field expertise, insights gained from tag market leadership, and industry ratified EPCglobal testing procedures to deliver recommendations and certified results which allow you to encode, read, ship and locate tags with confidence.

- **Anechoic Chamber Testing:** The RFID Solutions Center offers tag testing in an industry standard anechoic chamber designed to assure optimal and exacting tag read information. Complete tag testing reporting accompanies all testing done by the RFID Solutions Center.
- **High Speed Conveyor:** The RFID Solutions Center is fully equipped with a 660 foot per minute conveyor capable of testing tag applicators, readers, and diversion.
- **Shipping and Receiving Dock:** The RFID Solutions Center has two dock doors outfitted with RFID Readers enclosed in dock door portals complete with photo eyes, light stacks and other options to validate and optimize your installation requirements. Forklifts, dollies and hand trucks allow for simulation of diverse environments.

RFID Installation Services – Whether expanding an existing infrastructure or deploying for the first time, RFID installation requires a highly-skilled team dedicated to rolling up the sleeves and efficiently executing the program design. Acting upon a full understanding of the business case and armed with industry leading RF knowledge, The Alien RFID Solutions Center technical professionals minimize business interruption and outages while installing, testing and optimizing an RFID

Project Management Services – RFID Project Management provides a single point of accountability for systematic orchestration of stakeholder activities throughout critical project lifecycle phases including project initiation, requirements gathering, design, implementation, testing, execution, and maintenance. The Alien RFID Solutions Center's Professional Services team has built upon such quality management processes as Lean and Six Sigma to establish an industry leading knowledge base for delivering programs that impact an organizations bottom line. Capitalizing on decades of field experience, successes across an array of industry sectors, and the largest partner ecosystem network, Alien's Professional Services team through its tested Project Management Methodology (PMM) takes the risk out of RFID deployment.

Site Analysis - RFID Site Analysis is a thorough investigation into the business case, use case, environmental considerations, and performance measurements upon which an RFID implementation

plan is established. Predictable implementation risks can be avoided and a plan to achieve the greatest opportunities for ROI can be assured by leveraging the industry founding RFID solution design and implementation experience of Alien®'s Professional Services team. Seasoned experts map solution considerations after careful analysis of the existing physical environment, RF characteristics and its interaction with product materials, and current business processes so that you can deploy in an effective manner.

INDUSTRY VERTICALS SERVED:

- ✓ Retail
- ✓ Pharmaceutical
- ✓ Compliance
- ✓ Auto
- ✓ Banking and Finance
- ✓ Industrial Manufacturing
- ✓ Specialized Industries

AWARDS/KEY ACHIEVEMENTS:

- ✓ ISO Certification 9000:2008
- ✓ CompTIA RFID+ Certified Testing Center
